

 **Parkin**

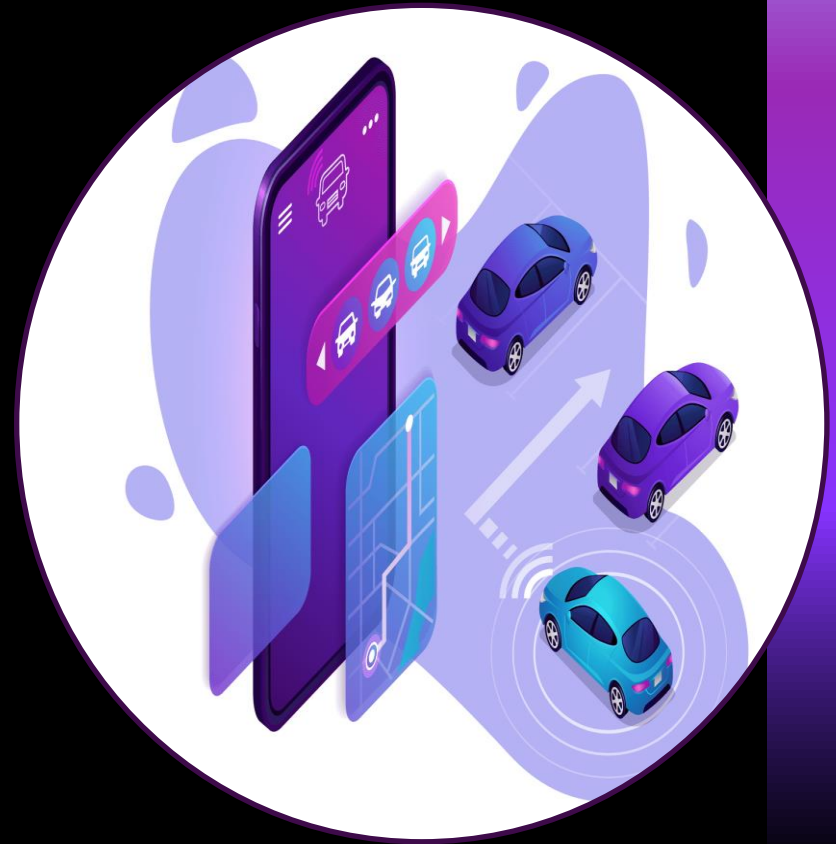

The Smart Parking Solution

By GateWay Group

Introduction

In today's urban landscapes, finding a parking spot can be a daunting task. But what if technology could make this process easier, more efficient, and environmentally friendly? That's precisely what our smart parking system aims to achieve.

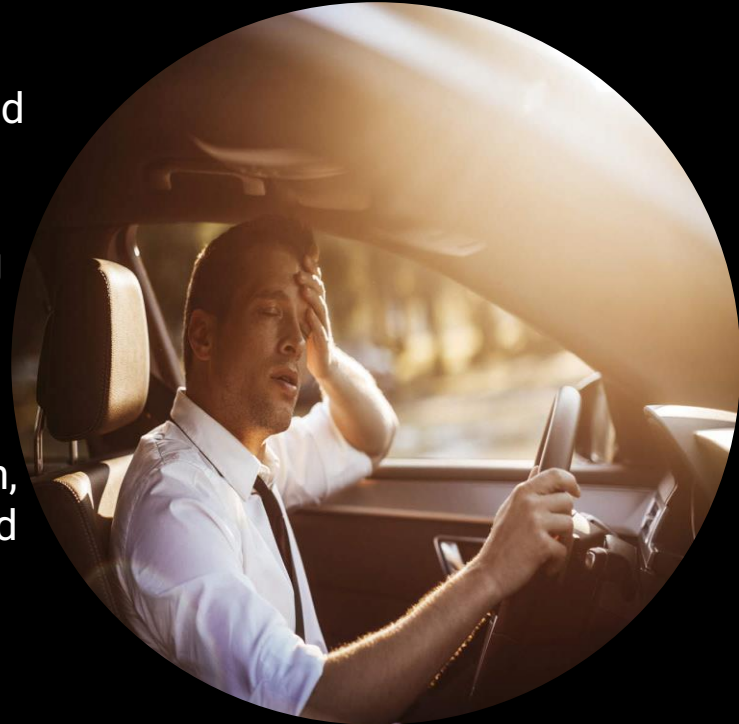

The Parking Challenge

Spotting the parking spaces with available slot in densely populated areas. Create Traffic congestion and Environmental impact due to increased emissions from circling vehicles.

Corporates and Business owners encounter inefficiency, congestion, large manpower requirements, and improper management in normal parking..

Solution

**“Parkin Smart Parking:
Revolutionizing Urban
Mobility”**

About Parkin

SaaS Based Smart Parking Management Platform and End-to-End Solution Provider including **Hardware & Human Resources**.

With **AI, Deep Learning, IoT & Advance Analytics** at the forefront, we integrate parking spaces & provide seamless parking availability and revenue collection experience.

For Public, Parking owners and Corporates

What We Offer

Parkin Mobile App

Mobile App for Customers, offering them a hassle-free way to find and secure parking spaces, advance slot booking and Navigate to the parking space.

Admin Dash Board

An admin dashboard for parking facilities enables operators to monitor and manage parking spaces, reservations, payments, security, and maintenance efficiently.

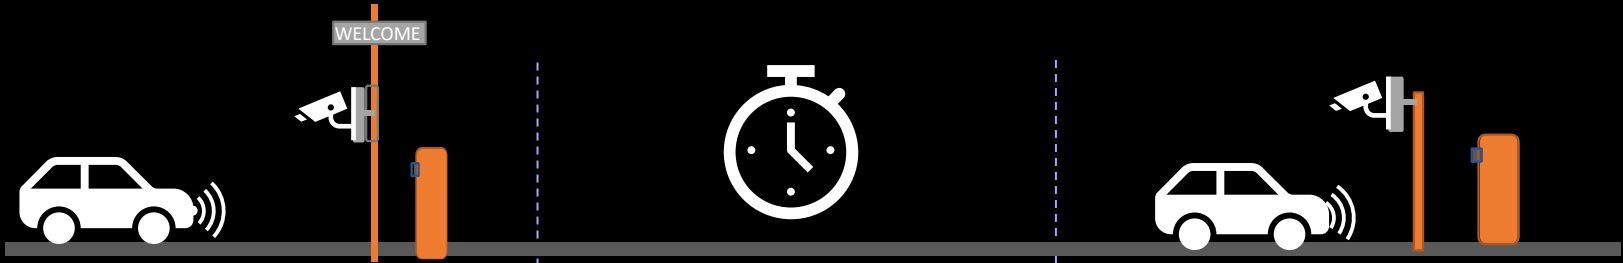

Web Portal

The parking web portal for owners offers real-time monitoring of parking spaces and generates revenue reports on a daily, monthly, and cumulative basis.
